- sourabhkushwaha0701@gmail.
- New Subhash Nagar, Bhopal

SKILLS & PROFICIENCIES

- Proficient in **Core Java** and **Java 8** with strong object-oriented programming expertise.
- Strong understanding of **OOPS** concepts like Encapsulation, Inheritance, Polymorphism, and Abstraction to design modular and reusable code.
- Experienced in developing web applications using **Spring MVC** and **Spring Boot** frameworks.
- Skilled in database management and **ORM** with **Hibernate** and **JPA** for seamless data handling.
- Expertise in **REST API** development, ensuring efficient data exchange between services.
- Proficient in build management and dependency management using **Maven.**
- Skilled in **MySQL** databases for effective data storage and retrieval solutions.
- **J2EE** for developing enterpriselevel applications, ensuring scalability and reliability.
- Skilled in **JDBC** for efficient database interaction, including connection management, transaction handling, and query optimization.
- Strong understanding of Java **Collections** Framework, including **List, Set, Map,** and their implementations for efficient data handling and manipulation.
- Proficient in **Java 8** features like **Streams, Lambda expressions** and **Functional** Interfaces for efficient data processing and manipulation in Collections.

PROFESSIONAL SUMMARY

Highly motivated Java developer with hands-on expertise in building enterprise-grade applications using Spring Boot, Hibernate, and RESTful APIs. Proficient in MySQL database design and development, ER Diagram modeling, and creating efficient backend solutions. Seeking a challenging position to leverage my skills in Spring Boot, Hibernate, and MySQL to contribute to impactful software development.

EDUCATION

Bachelor Of Technology CSE,
Vidhyapeeth Institute Science and Technology, Bhopal
Duration : 2022 to Present At- 7.80 CGPA

S.V.M Higher Secondary School Bankhedi
Passout year: 2022 At- 82.40 %

S. V. M High school Keshvnager Bankhedi
Passout year : 2020 At- 90.50 %

PROJECTS

GadgetHub (E-Commerce Website) **(Minor Project)**

GadgetHub is a full-stack Java-based e-commerce web application designed to sell a wide range of electronic gadgets such as smartphones, laptops, smartwatches, and accessories. This project provides a user-friendly platform that allows customers to browse gadgets, manage a shopping cart, and place orders, while also offering administrative control over product listings and orders. The application is developed using Core Java, JSP (JavaServer Pages), Servlets, and JDBC for the backend. The frontend is built with HTML, CSS, JavaScript, and Bootstrap for responsive design. ORACLE is used as the database to store user, product, and order information.

Hiresence (Smart AI Resume Analyzer) **(Internship Project)**
Developed backend modules for an AI-powered resume analysis and job-matching web application using Java, Servlets, JSP, and JDBC.
Integrated Affinda AI API to extract resume information and support automated resume analysis and skill-based job matching.
Implemented database operations using MySQL and collaborated with the team to integrate backend services with the user interface

ROLES AND RESPONSIBILITIES

- Develop and maintain Java applications using **Core Java** and **Java 8**, emphasizing **object-oriented design** principles. Focus on implementing best practices to ensure robust and high-quality software solutions.
- Design and implement **RESTful APIs** with **Spring Boot** and **Spring MVC** integrating **Hibern**. Facilitate seamless communication between front-end and back-end systems for enhanced user experience.
- Manage data effectively using **MySQL** optimizing database performance and integrity.
- Streamline build processes with **Maven**, ensuring smooth integration of project dependencies. Maintain consistent project structures to facilitate easier deployment and collaboration.
- Collaborate using **Git** and **GitHub** for version control, ensuring seamless project coordination. Facilitate code reviews to maintain high coding standards and improve team collaboration.
- Design and optimize **algorithms** and **data structures** for improved application efficiency. Analyze performance metrics to inform development decisions and enhance overall application performance.
- Designed and developed enterprise-level **Java J2EE applications,** employing advanced design techniques to deliver robust and scalable solutions.
- Utilize **JDBC** for efficient database connectivity and Servlets for dynamic content generation. Optimize application architecture for improved performance and responsiveness.
- Stay updated with emerging technologies and trends, continuously enhancing development skills. Faster a culture of continuous improvement within the team to adapt to evolving project needs.
- Collaborate in cross-functional teams to troubleshoot and **resolve** complex **technical issues**. Ensure timely resolution of challenges to keep projects on track and within scope.
- Utilize **Spring Data JPA** for efficient data access and manipulation in Java applications. Simplify database interactions while maintaining clean and efficient code.
- Conduct performance tuning of **Java applications** to enhance efficiency and resource utilization. Analyze bottlenecks and implement solutions to optimize application performance.

EXPERIENCE & certification

- Pankaj Sir Academy Intership On Full Stack Development
  Duration : 01/10/2024-Now

- Intership Program on Object Oriented Programming Language
  Duration : 17/12/2023-28/01/2023

- Sharma Computer Academy Pvt.Ltd Intership On Full Stack Development
  Duration : 11/09/2024-23/12/2024
